Cover letter

My name is Eneko Ruiz Mollón, I am from Rentería (Gipuzkoa), and in March 2027 I will complete my Bachelor's Degree in Computer Engineering (Software Engineering track) at UPV/EHU. I am looking to join a team as a junior developer.

How I work. To me, a good technical solution is not the most complex one, but the one that solves the need with the minimum necessary code while accounting for all scenarios: secure, resilient if the connection drops, clean in appearance, and accessible to anyone. That same standard guides everything I do, including this résumé. Scanning the QR code in the header will take you to my interactive portfolio, which I designed and built myself with the same attention to detail.

What I have learned in real environments. I have built a booking system for a local business and a tracking application with active users. Both taught me something no university course covers: when real people use your software, details are never optional. During my internship, I brought that same standard: I modeled databases in PostgreSQL, integrated frontend and backend with React and Supabase, and suggested technical alternatives whenever I spotted an opportunity to simplify or improve.

What I am looking for. A rigorous team where I can learn from more experienced engineers and contribute, from day one, sound judgment, consistency, and care for the code I write. I am eager to learn, tackle real challenges, and accelerate my growth in a demanding work environment. My goal is to learn quickly, take on responsibilities, and establish myself as an autonomous and reliable developer for the team.

I am available to work on-site, hybrid, or remotely, and I would welcome the opportunity to discuss in person how I work.

Kind regards,
Eneko Ruiz Mollón

Professional Summary

Junior Software Engineer with a solid background in full stack development (React, TypeScript, Node.js, Supabase...) and the ability to learn and adapt quickly to any technology as projects require. Experience in personal projects and solutions for local businesses, eager to join a team to continue growing professionally.

Education

Bachelor's Degree in Computer Engineering 09/2023 – 03/2027 (expected)

University of the Basque Country (UPV/EHU) · Software Engineering track

Final Degree Project: extending the StudiOS platform for the photography sector.

Languages

English
C1
Official Cambridge certificate

Basque
C1
Official HABE certificate

Spanish
Native

Professional Experience

Full Stack Developer (Internship) 05/2026 – 08/2026

SST PRO DYNAMICS SLL

- Full stack development on a web platform with React, integrating new frontend features with Supabase backend services.
- Designed the data model, tables and queries in PostgreSQL.
- Proposed technical alternatives to the team, drawing on experience from my own projects.

Projects

Booking system for a beauty salon React, TypeScript, Next.js, Firebase, Google Calendar API, Resend

Online booking and management panel (CMS) for a real salon, now being launched. Syncs the schedule with Google Calendar and sends automatic emails.

Reminders and tasks app React, TypeScript, Zustand, IndexedDB, Node.js, Express, Prisma, PostgreSQL

Offline-first PWA: cross-device sync, natural-language tasks, push notifications and an MCP server for AI.

Password manager React, TypeScript, Web Crypto API, IndexedDB, WebAuthn, Firebase

AES-GCM encryption with PBKDF2, 2FA codes (TOTP), biometric unlock and encrypted sync.

Menstrual cycle tracking app React, TypeScript, Tailwind CSS, Node.js, PostgreSQL, JWT, Capacitor

Cycle and wellbeing log with data stored on the device, a synced API and iOS and Android apps (Capacitor). Used by a small group of people.

Technical Skills

Languages:	**TypeScript** · **JavaScript** · C# · Java · Python · **SQL** · Bash · HTML · CSS · C
Frontend:	**React** · **Next.js** · Vite · Tailwind CSS · Zustand · PWA
Backend & data:	**Node.js** · .NET · Express · REST APIs · **PostgreSQL** · SQL Server · Prisma · **Supabase** · Firebase · IndexedDB
Testing & DevOps:	**Docker** · Azure · AWS · Vitest · Playwright · **Git** · GitHub Actions · Vercel · Linux

Additional Training

Advanced Generative AI Applications — University of Burgos
